

ABSTRACT

The present invention provides a shelf **300** for a barbecue grill frame assembly **302** of a barbecue grill. The shelf **300** has a bottom wall **310**, a plurality of sidewalls **312-318**, and a securing member **308**. The shelf **300** has a perimeter that is cooperatively dimensioned with the interior space of the barbecue grill frame assembly **302** such that the shelf **300** is positioned within the interior space. The securing member **308** secures the shelf **300** to the barbecue grill frame assembly **302** in a first position. The securing member **308** adjusts to a second position to detach the shelf **300** from the barbecue grill frame assembly **302**.
